Energy Information Administration Washington, DC

## Weekly Coal Production

Production for Week Ended: March 7, 1987

## Highlights

U.S. coal production in the week ended March 7, 1987, as estimated by the Energy Information Administration, totaled 16.9 million short tons (bituminous coal and lignite, 16.8 million short tons; Pennsylvania anthracite, .09 million short tons). This was 1.2 percent higher than in the previous week, and was 7.5 percent lower than production in the corresponding week of 1986.

Cumulative U.S. coal production from January 1 through March 7, 1987, was estimated at 159.3 million short tons, 7.0 percent below the 171.2 million short tons produced in the comparable period in 1986.

The methodology used to make weekly estimates of coal production was published in the Weekly Coal Production (DOE/EIA-0218(86/35)), released for publication on September 8, 1986.

Table 2. Coal Production by State (Thousand Short Tons)

| Region and State                          | Week Ended |          |              |
|---|------------|----------|--------------|
|   | 03/07/87   | 02/28/87 | 03/08/86     |
| Bituminous Coal <sup>1</sup> and Lignite  |            |          |              |
| East of the Mississippi                   | 11,242     | 10,997   | 11,503       |
| Alabama                                   | 471        | 481      | 516          |
| Illinois                                  | 1,271      | 1.239    | 1.334        |
| Indiana                                   | 586        | 624      | 696          |
| Kentucky                                  | 3,087      | 2,958    | 3,179        |
| Kentucky, Eastern                         | 2,296      | 2,201    | 2,362        |
